THE REPLY FILED 04 November 2002 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continuation of 5. does NOT place the application in condition for allowance because: Applicants' arguments have been largely addressed in the final rejection. To Applicants' argument that the ee% is not mentioned in Collett the Examiner responds that Collett dicloses optically pure material which has a presumed ee of 100%. To Applicants' argument that Collett teaches the formation of racemic mandelic acid derivaties the Examiner points out that this material is then resolved to give the optically pure compounds after recrystallizing from benzene. In addition much of Applicants' argument is directed toward the co-solvent which is only optional in independent claims 11 and 16.
